INFORMATION MEMORANDUM
RSA-IM-76-16

August 7, 1975

TO: STATE REHABILITATION AGENCIES (GENERAL)
STATE REHABILITATION AGENCIES (BLIND)
ASSISTANT REGIONAL DIRECTORS, OHD
REGIONAL REHABILITATION DIRECTORS

SUBJECT: Distribution of the "Quarterly Status Report: Disability Insurance Program (SSDI) and Supplemental Security Income Program (SSI)" - Quarter ending March 31, 1975

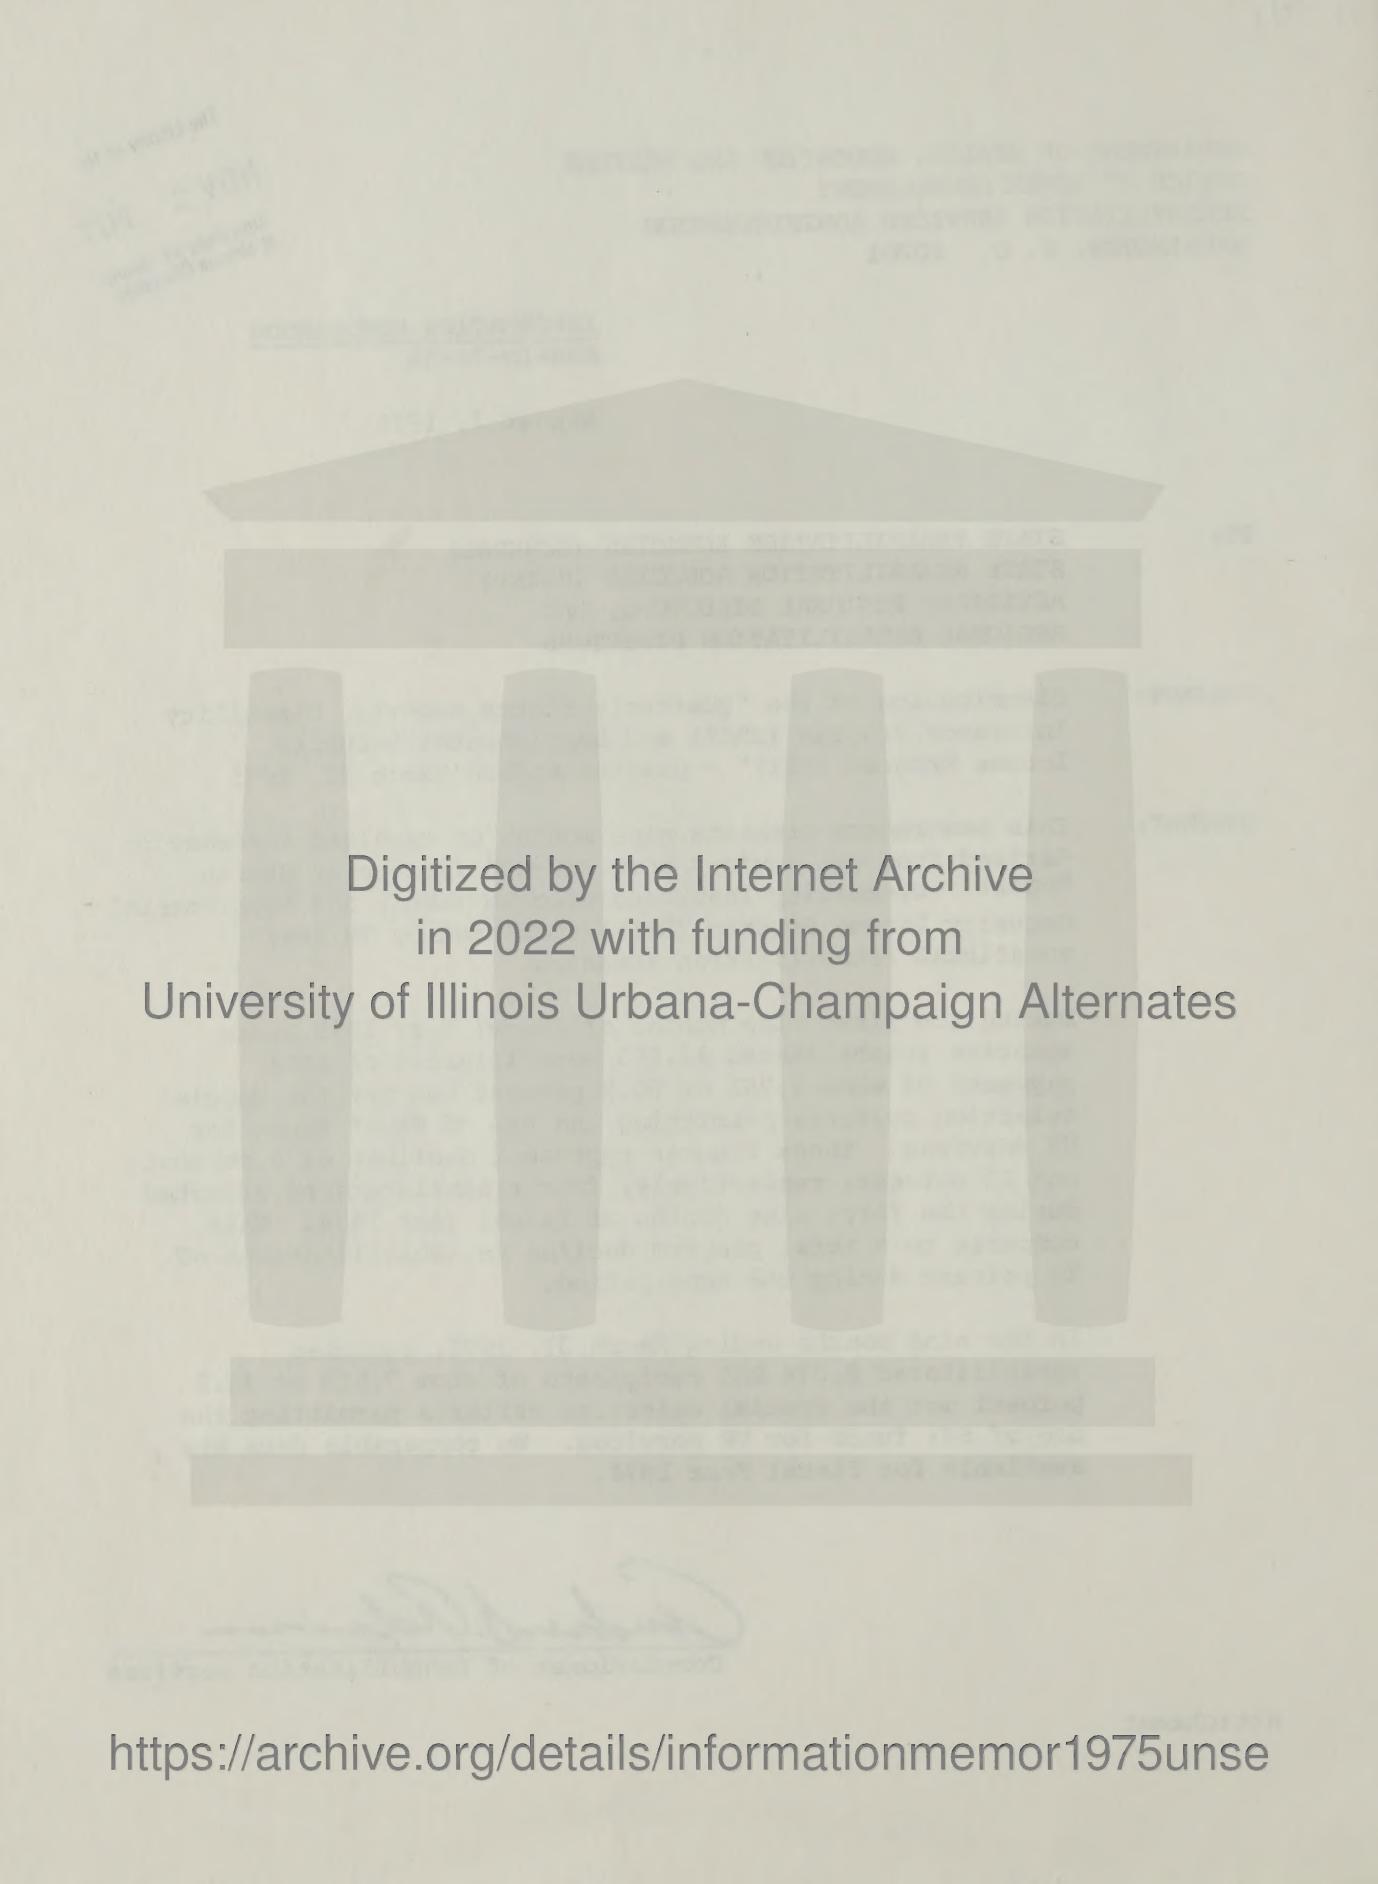

CONTENT: This memorandum presents nine months of caseload information derived from the revised Form RSA-200 (Quarterly Status Report: Disability Insurance Program (SSDI) and Supplemental Security Income Program (SSI)) submitted by 79 State vocational rehabilitation agencies.

During the first nine months of Fiscal Year 1975 State agencies rehabilitated 13,803 beneficiaries of SSDI payments of whom 7,751 or 56.2 percent had met the special selection criteria permitting the use of Trust Funds for VR services. These figures represent declines of 5 percent and 12 percent, respectively, from rehabilitations effected during the first nine months of Fiscal Year 1974. This compares to a total program decline in rehabilitations of 14 percent during the same period.

In the nine months ending March 31, 1975, agencies rehabilitated 8,074 SSI recipients of whom 3,513 or 43.5 percent met the special selection criteria permitting the use of SSI funds for VR services. No comparable data are available for Fiscal Year 1974.

Andrew J. Adams

QUARTERLY STATUS REPORT: DISABILITY INSURANCE PROGRAM (SSDI) AND
SUPPLEMENTAL SECURITY INCOME PROGRAM (SSI)

HIGHLIGHTS

TABLE 1

Through March 31, 1975, State agencies rehabilitated 13,803 SSDI beneficiaries. Of this number 7,751 (56.2 percent) met the special selection criteria permitting the use of Trust Funds for rehabilitation services. On March 31, 1975, there were 71,498 SSDI beneficiaries in Statuses 10 to 24 of whom 46,845 (65.5 percent) had met the special selection criteria.

TABLE 2

The number of rehabilitated recipients of SSI payments came to 8,074 during the first three quarters of Fiscal Year 1975. Only 3,513 (43.5 percent) of these cases met the special selection criteria permitting the use of SSI funds for rehabilitation services. On March 31, 1975, there were 44,225 SSI recipients in Statuses 10 to 24 of whom 24,913 (56.3 percent) had met the special selection criteria.

TABLE 3

Of the total 86,329 cases meeting the special selection criteria, whether closed or not, 60,362 or 69.9 percent were Trust Funds cases. Such cases accounted for 72.2 percent of cases rehabilitated and 73.1 percent of cases not rehabilitated through March 1975. On March 31, 1975, 69.2 percent of cases in Statuses 10 to 24 meeting the special selection criteria were Trust Funds cases.

Cases meeting the special selection criteria permitting the use of SSI funds accounted for 30,978 cases, or 35.9 percent of all "selection criteria" cases. The overlap is caused by 5.8 percent of the cases (5,011 of 86,329) which met the special selection criteria permitting the use of both Trust Funds and SSI funds.

TABLE 4

At the end of the third quarter of Fiscal Year 1975, the number of SSDI beneficiaries served^{1/} totaled 95,479, or 20.8 percent greater than the comparable period of the prior fiscal year. An increase of 16.4 percent was shown in the number of served SSDI beneficiaries meeting the special selection criteria from the first nine months of Fiscal Year 1974 to the same period in Fiscal Year 1975. Relative to the entire VR caseload served (which increased by only 3.3 percent), beneficiaries accounted for 8.7 percent of all 1,103,712 cases served^{1/} through March and beneficiaries meeting the special selection criteria for 5.5 percent.

The total number of SSI recipients served^{1/} through the third quarter of Fiscal Year 1975 came to 57,897 or 5.2 percent of the total VR cases served. Of these, 30,978 met the special selection criteria, representing 2.8 percent of all 1,103,712 cases served^{1/}.

TABLE 5

The total number of SSDI beneficiaries and/or SSI recipients in the referral/applicant statuses on March 31, 1975, came to 78,742. Of these cases, 48,924 or 62.1 percent were SSDI beneficiaries, and 37,087 or 47.1 percent were SSI recipients. Individuals receiving both SSDI and SSI payments came to 7,269 or 9.2 percent which accounts for the overlap.

TABLE 6

The total number of SSI recipients in agency caseloads at any time during the first nine months of Fiscal Year 1975 came to 141,095. Of these cases, 15,767 or 11.2 percent, were recipients by reason of blindness. Of the 8,074 SSI recipients rehabilitated, 19.4 percent were blind. This contrasts with the blind representation of only 4.5 percent among the 41,957 SSI cases not accepted for VR services. The rehabilitation rate of the active case closures among blind recipients was 75.1 percent, versus a rate of 56.2 percent among recipients of SSI payments by reason of disability (non-blind).

^{1/} Sum of cases closed rehabilitated, not rehabilitated and on hand in Statuses 10 to 24 on March 31, 1975.

INFORMATION MEMORANDUM
RSA-IM-76- 28

October 7, 1975

TO: STATE REHABILITATION AGENCIES (GENERAL)
STATE REHABILITATION AGENCIES (BLIND)
ASSISTANT REGIONAL DIRECTORS, OHD
DIRECTORS, ORS

SUBJECT: Number of Rehabilitations: July 1 to July 31,
Fiscal Years 1975 and 1976

CONTENT: The attached table contains the total number of persons rehabilitated by State vocational rehabilitation agencies during the first month of Fiscal Years 1975 and 1976.

Through July 31, 1975, there were 13,104 persons whose cases were closed rehabilitated, an increase of 12.5 percent nationally from July, 1974 when 11,645 persons were rehabilitated. This contrasts with the decline of 45.8 percent in the number of rehabilitations during July, 1974 from July, 1973 (11,645 versus 21,503). It should be noted that the percent changes shown in this report for many agencies are rather large, due as much as anything else to the low base numbers from the prior fiscal year. As the year progresses, percent changes will begin to even out.

Gains in the number of rehabilitations were reflected in 47 agencies during July, 1975 over July, 1974. Despite the increase in rehabilitations in July 1975, they are fewer in number than rehabilitations in each July from 1971 to 1973.

Andrew S. Adam

Commissioner of Rehabilitation Services

INFORMATION MEMORANDUM
RSA-IM-76-23

August 29, 1975

TO: STATE REHABILITATION AGENCIES (GENERAL)
STATE REHABILITATION AGENCIES (BLIND)
ASSISTANT REGIONAL DIRECTORS, OHD
REGIONAL REHABILITATION DIRECTORS

SUBJECT: Address of Client at Date of Closure, Form RSA-300

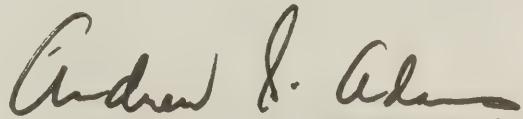

CONTENT: A recent meeting with a group of State DVR representatives revealed that a number of State agencies are experiencing considerable difficulty in carrying out their mandated responsibilities for annual review, post-employment services, etc., because the only client address of record is the one recorded at time of referral on the Form RSA-300, or a similar intake form.

While it is not appropriate to incorporate into the Form RSA-300, the client address at time of closure (as was suggested), State DVR agencies are being advised of this emerging problem, and are urged to instruct counselors of the need to record address at time of closure in the case file.

Counselors might also give the client a simple change of address form with a request that the client complete and forward the form to the State agency if the address changes. It would also facilitate matters if the counselors recorded the case number of the closed case file on the change of address form.

We urge State agencies to institute procedures that would increase their chances of locating clients, who, for whatever reason, may have to be contacted in the future.

INQUIRIES TO: Regional Rehabilitation Directors.

CASELOADS IN STATE VOCATIONAL REHABILITATION AGENCIES, FY 1975

The two most striking features of caseload activity during Fiscal Year 1975 were (a) the accelerated expansion of caseload levels after two years of rather modest increases and (b) the first decline in the number of rehabilitations after 20 years of continuous growth.

Fiscal Year 1975 was the year when service to increased numbers of severely disabled persons was strongly emphasized. Much of the change in caseload activity may be attributed to adjustments made by agencies to serve more of the severely disabled. Undoubtedly, new referral sources were tapped while established sources likely to refer the severely disabled were more fully exploited. Consequently, the number of new referrals rose to over 1.2 million, a 12 percent increase over the comparable Fiscal Year 1974 figure and the largest relative increase since Fiscal Year 1968. This upturn in the number of new referrals resulted in increased numbers of cases accepted for vocational rehabilitation and extended evaluation services (up 5 percent and 29 percent, respectively).

The apparent influx of the severely disabled into State agency offices very likely accounted for the fact that only 46 percent of all cases on which agencies decided eligibility status during Fiscal Year 1975 could be accepted for services. This was the lowest acceptance rate since Fiscal Year 1958 and the second lowest since Fiscal Year 1943, when acceptance rates were first calculated. The assumption is that the severely disabled because of the seriousness of their handicapping conditions, can less often than the non-severely disabled be deemed eligible for rehabilitation services.

It must be noted, too, that among active cases closed out in Fiscal Year 1975, only 70 percent could be rehabilitated while the other 30 percent had to be closed not rehabilitated. This was the lowest rate of successful rehabilitation since Fiscal Year 1954, and is likely another reflection of the effect of greater numbers of the severely disabled in State agency caseloads.

While more persons, both severely and non-severely disabled, were in contact with State rehabilitation agencies during Fiscal Year 1975 than ever before--encompassing nearly 2.4 million cases, up 8.4 percent from Fiscal Year 1974--the number of successfully rehabilitated clients declined by more than 10 percent to 324,039 cases. This was the first decline in rehabilitations registered in over a score of years. Of the 324,039 rehabilitated clients, 115,746 were severely disabled, an increase of 1.5 percent over Fiscal Year 1974 while 208,293 were non-severely disabled, down by 15.7 percent from the prior fiscal year. To some degree, at least, these results may be evidence of priority services being delivered to the severely disabled as mandated in the Rehabilitation Act of 1973. The overall decline in rehabilitations may be attributed

to several factors including inflation and the recession which increased costs while depressing the number of rehabilitations. Also, since severe cases are generally more costly to serve than non-severe cases, there is, necessarily, a faster depletion of monetary resources when the severe comprise increased proportions of the caseload. Finally, the definition of a rehabilitated client used in Fiscal Year 1975 differed significantly in one respect from the definition in effect in Fiscal Year 1974, viz., the number of days of suitable employment required for a successful closure was changed from a minimum of 30 days to a minimum of 60 days. No doubt, the impact of this last factor on the number of rehabilitations was minimal compared to the other factors. Nevertheless, this change cannot be ignored in considering the decrease in the number of rehabilitations.

HIGHLIGHTS

Total Closures and Cases on Hand, June 30, 1975 (Tables 1 and 1A)

1. Of the 2,391,624 cases in all statuses handled by State agencies during Fiscal Year 1975, 1,094,948 (45.8 percent) were closed from the vocational rehabilitation process by June 30, 1975. This number represents an increase of 6.6 percent over the 1,027,528 cases closed in Fiscal Year 1974.
2. The largest increase in closures among the various closure statuses occurred among referrals which registered an impressive 28.3 percent increase. This upturn in the number of referral closures was probably a reflection of increased referrals of the severely disabled who were more likely to be rejected during the early stages of the vocational rehabilitation process.
3. Among all closure groups, only the rehabilitated closures declined during Fiscal Year 1975 when 324,039 persons were successfully closed. This was a loss of 10.3 percent from Fiscal Year 1974 when 361,138 individuals were rehabilitated. This was also the first time in 21 years that rehabilitations declined. The level of 324,039 rehabilitations was not only below the level of Fiscal Year 1974, but it was also below those for Fiscal Years 1973 (360,726) and 1972 (326,138).
4. The 1,296,676 cases on hand on June 30, 1975 comprised 54.2 percent of the total number of cases in Statuses 00-30 (2,391,624), and reflected a 9.9 percent increase over the previous fiscal year. The stunning 41.9 percent increase in the number of cases in extended evaluation is likely a direct result of intensified efforts to rehabilitate the severely handicapped who most frequently require placement into extended evaluation.

New Referrals and Cases on Hand, July 1, 1974 (Tables 2 and 2A)

5. During Fiscal Year 1975 State agencies carried 2,391,624 cases in Statuses 00-30. This represented an increase of 184,359 cases or 8.4 percent over the prior fiscal year.
6. The cases in all statuses were nearly equally divided between new referrals received during the year (50.8 percent) and cases already on hand at the beginning of the year (49.2 percent). During Fiscal Year 1974, these percentages were exactly reversed.
7. The number of new referrals increased by 11.9 percent from 1,085,356 in Fiscal Year 1974 to 1,214,801 in Fiscal Year 1975. This was the largest number of new referrals ever recorded in any year and probably represents the results of developing new sources referring the severely disabled and better exploitation of sources, such as the Social Security Administration, from which many severe cases are likely to come.

Referrals (Status 00)(Tables 3 and 3A)

8. New referrals (1,214,801) and referrals on hand July 1, 1974 (124,688) accounted for a total of 1,339,489 referrals available during Fiscal Year 1975--12.7 percent more than were available during the prior year.
9. Of the 1,211,853 referral cases processed, 73.1 percent (or 885,737) became applicants in Fiscal Year 1975 while the remainder were not accepted for services. The only decline registered in referral activity was in the number of referrals on hand June 30 which was down less than one percent from Fiscal Year 1974.

Applicants (Status 02)(Tables 3 and 3A)

10. Of the 846,609 applicants processed in Fiscal Year 1975, 61.0 percent were accepted for services; 34.1 percent were closed from the vocational rehabilitation process; and the remaining 4.9 percent were accepted for extended evaluation services.
11. Compared to Fiscal Year 1974, the number of applicants in Fiscal Year 1975 accepted for services rose by 4.7 percent. (In Fiscal Year 1974, the increase over Fiscal Year 1973 was only 1.3 percent).
12. A large increase (28.5 percent) in applicants accepted for extended evaluation occurred in Fiscal Year 1975. This is probably a reflection of the influx of severely disabled individuals into State agency caseloads.

Extended Evaluation Cases (Status 06)(Tables 3 and 3A)

13. Overall, 65,611 cases were in extended evaluation at some time during Fiscal Year 1975, a 21.4 percent increase over the comparable figure a year earlier. It is interesting to note that, although increases were associated with all extended evaluation items, the increase in the number accepted for VR services from Fiscal Year 1974 to 1975 amounted to less than one percent. The corresponding increase from Fiscal Year 1973 to 1974 was 9.7 percent. On the other hand, the number of extended evaluation cases not accepted for service which increased only 1.4 percent from Fiscal Year 1973 to 1974 rose 13.8 percent from Fiscal Year 1974 to 1975. Obviously, the number of extended evaluation cases accepted for services did not keep pace with the increased caseload levels of such cases.

Active Cases (Statuses 10-30)(Tables 3 and 3A)

14. The number of active cases served in State agencies totaled 1,244,338--3.6 percent more than in Fiscal Year 1974. About 37.4 percent of these cases (465,890) were closed from the active caseload during the year while the remaining 62.6 percent (778,448) were still receiving services on June 30, 1975.
15. Of the 465,890 active cases closed during Fiscal Year 1975, some 324,039 or 69.6 percent were rehabilitated (Status 26); 104,794 (22.5 percent) were closed not rehabilitated after the individualized written rehabilitation program was initiated (Status 28); and 37,057 (8.0 percent) were closed before the program was initiated. The rehabilitation rate of 69.6 percent was the lowest recorded in 21 years and is probably indicative of the growing proportion of severe cases entering the active caseload.
16. The majority (58.2 percent) of the 778,448 cases which were still active on June 30, 1975 were receiving restoration (Status 16) or training (Status 18). Another 14.7 percent of the active cases were in some phase of program development (Statuses 10 and 12). The remainder were in various other active caseload statuses.

Selected Caseload Items by Region and Agency (Table 4)

17. Nationally, 46 percent of all cases for which eligibility for services was determined during Fiscal Year 1975 were accepted for services. This is a distinct departure from acceptance rates observed since Fiscal Year 1958 which have varied only from 48 percent to 54 percent. By region, the percents in Fiscal Year 1975 ranged from 33 in Region IX to 58 in Region VI. Only Region IX exhibited an increase in the acceptance rate from Fiscal Year 1974 (from 28 percent to 33 percent).
18. Overall, roughly 70 percent of the active cases closed during Fiscal Year 1975 were rehabilitated. By region, the rehabilitation rates ranged from 60 percent in Region IX to 75 percent in Regions IV and VII. No region registered an increase in the rehabilitation rate from Fiscal Year 1974 although for two of them, Regions VI and IX, the rates remained the same (72 and 60 percent, respectively).

Table 1. --Distribution of all cases by type of closure from July 1, 1974 to June 30, 1975, and cases on hand in various statuses on June 30, 1975, in State vocational rehabilitation agencies, Fiscal Year 1975

^{1/} Sum of referrals not accepted for VR services and applicants and extended evaluation cases accepted or not accepted for VR services.

^{2/} Sum of rehabilitated and not rehabilitated closures.

^{3/} Estimated.

Total Number of Rehabilitations, Severely Disabled Rehabilitations and Active Cases Served by State Vocational Rehabilitation Agencies Per 10,000 Disabled Population, by Region and State; and Rank by State

Table 5 shows the number of persons rehabilitated by State vocational rehabilitation agencies per 10,000 disabled population for Fiscal Years 1973 to 1975. Nationally, the rate has declined since Fiscal Year 1973 from 296 to 252 in Fiscal Year 1975. On the basis of rehabilitations per 10,000 disabled population during Fiscal Year 1975, South Carolina with 716 ranked first in the nation, followed by the District of Columbia (611) and Utah (533). Arizona and Indiana registered the lowest rates, 88 and 109, respectively.

Table 6 presents the number of severely disabled persons rehabilitated per 10,000 disabled population for Fiscal Years 1974 and 1975. The national rate declined slightly from 91 to 90 although severe rehabilitations increased by 1.5 percent in Fiscal Year 1975. By State, South Carolina with 238 severe rehabilitations per 10,000 disabled population and Kentucky (217) and North Dakota (176) ranked first, second and third, respectively. Both Indiana and Arizona had the lowest rates of only 33 severe rehabilitations per 10,000 disabled population.

Table 7 shows the number of active cases served per 10,000 disabled population for Fiscal Years 1973 to 1975. The national rate increased slightly from 945 in Fiscal Year 1974 to 963 in Fiscal Year 1974 after a drop from 958 in Fiscal Year 1973 to 945 in Fiscal Year 1974. South Carolina with a rate of 2,380 ranked first; Utah (2,323) ranked second; and North Dakota ranked third with 1,977 in Fiscal Year 1975. These three States occupied similar positions during Fiscal Year 1974. Arizona had the lowest rate (409) and California the next lowest (508).

1/ The state disability information found in the 1970 Census of Population, Series PC (1)-C, General Social and Economic Characteristics, has been updated to reflect the total population growth to July 1 of each fiscal year.

* Census disability data not available for Puerto Rico, Virgin Islands, Guam and the Trust Territories of the Pacific Islands.

HISTORICAL CASELOAD TRENDS

The following national tables present an overview of caseload trends in the State-Federal Program of Vocational Rehabilitation.

- Table A provides the number of rehabilitations since the program was initiated in Fiscal Year 1921 and the number of cases served since Fiscal Year 1938.

Nearly 4.5 million rehabilitations have been effected since the inception of the program. Over half of these rehabilitations were accomplished since Fiscal Year 1968.

- Tables B through F present eleven years of data on key caseload items, and the percent change from year to year.

The main feature here is that caseloads expanded more in Fiscal Year 1975 than in recent years, but not at rates experienced in the 1960's. Also, declines in acceptance and rehabilitation rates in Fiscal Year 1975 are clearly seen as departures from established patterns.

- Table G presents a detailed caseload summary for the past five years.
- Table H presents the number of persons rehabilitated each month as a percent of all rehabilitations for Fiscal Years 1971 through 1975.

The concentration of roughly one-fourth of all rehabilitations in May and June is the outstanding feature of this table.

Table A.--Number of active cases served and persons rehabilitated by State vocational rehabilitation agencies, Fiscal Years 1921-1975

Fiscal year	Cases served	Persons rehabilitated	Fiscal year	Cases served	Persons rehabilitated
1975	1,244,338	324,039

INFORMATION MEMORANDUM

RSA-IM-76-31

October 30, 1975

TO: STATE REHABILITATION AGENCIES (GENERAL)
STATE REHABILITATION AGENCIES (BLIND)
ASSISTANT REGIONAL DIRECTORS, OHD
DIRECTORS, ORS

SUBJECT: Number of Rehabilitations: July 1 to August 31,
Fiscal Years 1975 and 1976

CONTENT: The attached tables contain the total number of persons
rehabilitated by State vocational rehabilitation agencies
during the first two months of Fiscal Years 1975 and
1976.

Through August 31, 1975, there were 33,324 persons
whose cases were closed rehabilitated, an increase of
18.4 percent over the 28,144 successful closures through
August, 1974. Gains in the number of rehabilitations
were reflected in 49 agencies through August, 1975
over the same two-month period in 1974.

Although the number of rehabilitations so far this
year **is** a marked improvement over the number last
year, they are fewer in number than rehabilitations
accomplished in July and August of 1971, 1972 and 1973.

Andrew S. Adam
Commissioner of Rehabilitation Services

TO: STATE REHABILITATION AGENCIES (GENERAL)
STATE REHABILITATION AGENCIES (BLIND)
ASSISTANT REGIONAL DIRECTORS, OHD
DIRECTORS, ORS

SUBJECT: Distribution of the "Quarterly Status Report: Disability Insurance Program (SSDI) and Supplemental Security Income Program (SSI)," Fiscal Year 1975

CONTENT: The report covering caseload information as of June 30, 1975 and closures effected through the fourth quarter, for the subject group of clients is attached.

State agencies rehabilitated 22,336 beneficiaries of SSDI payments, of whom 12,585 or 56.3 percent had met the special selection criteria permitting the use of Trust Funds for VR services. The total number of SSDI beneficiaries increased by 1.5 percent from Fiscal Year 1974, but the number of SSDI beneficiaries who met the special selection criteria decreased from 13,358 in Fiscal Year 1974 to 12,585 in Fiscal Year 1975, a loss of 5.8 percent. This compares to a total program decline of 10.3 percent during the same period.

There were 14,113 SSI recipients rehabilitated in Fiscal Year 1975, of whom 6,436 or 45.6 percent had met the special selection criteria permitting the use of SSI funds for VR services. No comparable full year data are available for Fiscal Year 1974.

QUARTERLY STATUS REPORT: DISABILITY INSURANCE PROGRAM (SSDI) AND
SUPPLEMENTAL SECURITY INCOME PROGRAM (SSI)

HIGHLIGHTS

TABLE 1

During Fiscal Year 1975, State agencies rehabilitated 22,336 SSDI beneficiaries. Of this number 12,585 (56.3 percent) met the special selection criteria permitting the use of Trust Funds for rehabilitation services. Total beneficiaries increased by 1.5 percent from Fiscal Year 1974, however, those meeting the special selection criteria decreased by 5.8 percent from Fiscal Year 1974. On June 30, 1975, there were 72,095 SSDI beneficiaries in Statuses 10 to 24 of whom 48,273 (67.0 percent) had met the special selection criteria.

Approximately 59 percent of active case closures among SSDI beneficiaries, whether or not the special selection criteria were met, were rehabilitation closures. The comparable rehabilitation rate for the total State-Federal VR program was 70 percent.

TABLE 2

The number of rehabilitated recipients of SSI payments totalled 14,113 during Fiscal Year 1975. Of this number, 6,436 or 45.6 percent, met the special selection criteria permitting the use of SSI funds for rehabilitation services. On June 30, 1975, there were 46,872 SSI recipients in Statuses 10 to 24 of whom 27,514 or 58.7 percent had met the special selection criteria.

The rehabilitation rate among all SSI recipients was 56 percent and for those meeting the special selection criteria was 59 percent. This was comparable to the rehabilitation rates on SSDI active case closures previously mentioned.

TABLE 3

Of the total 101,224 cases served^{1/} during Fiscal Year 1975 which met the special selection criteria for the use of either Trust Funds or SSI funds, 69,653 or 68.8 percent, were Trust Funds cases. Such cases accounted for 69.8 percent of cases rehabilitated and 71.5 percent of cases not rehabilitated during Fiscal Year 1975. On June 30, 1975, 68.1 percent of cases in Statuses 10 to 24 meeting the special selection criteria were Trust Funds.

Cases meeting the special selection criteria permitting the use of SSI funds accounted for 38,232 cases or 37.8 percent of all "selection criteria" cases served. The overlap is caused by 6.6 percent of the cases served (6,661 of 101,224) which met the special selection criteria permitting the use of both Trust Funds and SSI funds.

TABLE 4

By June 30, 1975, the number of SSDI beneficiaries served^{1/} was 110,174, or 20.1 percent greater than in the comparable period in Fiscal Year 1974. In addition, the number of served SSDI beneficiaries meeting the special selection criteria increased from 60,651 on June 30, 1974 to 69,653 one year later, a 14.8 percent increase. With respect to the entire VR caseload served (which increased by only 3.6 percent), beneficiaries accounted for 8.9 percent of all 1,244,338 cases served during Fiscal Year 1975 and beneficiaries meeting the special selection criteria for 5.6 percent.

The total number of SSI beneficiaries served in Fiscal Year 1975 came to 70,323 or 5.7 percent of the total VR cases served. Of these 70,323 cases, 38,232 met the special selection criteria, or 3.1 percent of the total VR caseload.

TABLE 5

On June 30, 1975, the total number of SSDI beneficiaries and/or SSI recipients in referral/applicant statuses was 76,872. Of these cases, 48,759 or 63.4 percent were SSDI beneficiaries, and 36,240, or 47.1 percent were SSI recipients. Individuals receiving both SSDI and SSI payments came to 8,127 or 10.6 percent which accounted for the overlap.

TABLE 6

The total number of SSI recipients in agency caseloads at any time during Fiscal Year 1975 was 175,164. Of these 175,164 cases, 18,572, or 10.6 percent were recipients by reason of blindness. The percentage of persons receiving SSI payments by reason of blindness varied considerably depending upon the caseload item. For example, only 4.4 percent of SSI recipients not accepted for VR services were blind, but 18.8 percent of SSI recipients rehabilitated were blind. In light of this, it is not surprising to find, therefore, that the rehabilitation rate of active case closures among blind recipients was 78 percent versus a rate of 57 percent among recipients of SSI payments by reason of disability (non-blind).

1/ Sum of cases closed rehabilitated, not rehabilitated and on hand in Statuses 10 to 24 on June 30, 1975.

Table 5 - SSDI beneficiaries and SSI recipients in pre-acceptance statuses: Number and percent distribution, by type of case - Fiscal Years 1974 and 1975

Type	FY 1975		FY 1974		Percent change: FY 1975 vs. FY 1974 (5)
	No. (1)	% (2)	No. (3)	% (4)	
<u>Referral/applicant:</u> (June 30)					
Total	76,872	100.0	NA	---	-----
SSDI	48,759	63.4	43,654	---	+11.7
SSI	36,240	47.1	NA	---	-----
Dual	8,127	10.6	NA	---	-----
<u>Extended evaluation:</u> (June 30)					
Total	9,313	100.0	NA	---	-----
SSDI	5,812	62.4	3,563	---	+63.1
SSI	4,504	48.4	NA	---	-----
Dual	1,003	10.8	NA	---	-----
<u>Not accepted for VR:</u> (July 1 to June 30)					
Total	135,845	100.0	NA	---	-----
SSDI	82,303	60.6	69,657	---	+18.2
SSI	64,097	47.2	NA	---	-----
Dual	10,555	7.8	NA	---	-----

Note: Each total line = SSDI plus SSI minus Dual.

Table 6 - Blind and disabled SSI recipients, by caseload status -
Fiscal Year 1975

Status	Total (1)	Blind (2)	Disabled (3)	% Blind (4)
Total cases (00 to 30)	175,164	18,572	156,592	10.6
Referral/applicant ^{1/}	36,240	3,775	32,465	10.4
Extended evaluation ^{1/}	4,504	532	3,972	11.8
Not accepted for VR	64,097	2,807	61,290	4.4
Active cases ^{1/}	46,872	8,046	38,826	17.2
Rehabilitated	14,113	2,652	11,461	18.8
Not rehabilitated	9,338	760	8,578	8.1

1/ As of June 30, 1975.
